Armoire

Stop guessing. Start dressing

By: Tanya Patel

The Problem

- **Problem Statement**: People often have plenty of clothes, but still struggle to quickly choose an outfit that feels good, matches the occasion, and fits real-life constraints.

- Choosing an outfit takes too long especially in a hurry
- There are many factors that influence your outfits: weather, comfort, occasion, matching colors.
- People forget what they own and default to the same few “safe” outfits everyday.
- Inspiration apps show looks you can’t recreate with your actual closet.

Customer Discovery

Solution and Features

1) Create a digital closet

- Add clothes by either taking a photo or searching by store.
- Auto Detect item details and removes background

2) Organize + actually see what you own

- Build multiple closets based on season, style, and travel.

3) Generate outfits or build outfits

- AI outfit recommendations that consider weather + special occasions.

4) Track + learn from your wardrobe

- Outfit calendar to plan/log what you wore (find your favorites).

Why this app is better than other outfit generators

- This app will focus on your closet rather than requiring a social feed or browsing
- Only suggests outfits that match your constraints
- It can prioritize items you don't know how to wear so more of your wardrobe gets used

Thanks for listening!!
